## PURPOSE AND OBJECTIVES

The SAP User Experience Team (UX) is a centralized group within the Business Suite and Technology Group at SAP, the world leader in business software. Our group's mission is to provide wide-spread services to the organization, such as design services, design standards, usability testing, and the user-centered design process.

The UX Design USA team is looking for an intern with strong design skills to help us create and visualize innovative product experiences and present those to the product teams and end users for usability testing. Our team offers the place to stretch skills in new directions, gain industry experience, and an opportunity to leverage design to change the lives of end users of enterprise applications around the world.

## EXPECTATIONS AND TASKS

Intern responsibilities will focus on the creation of interactive prototypes, but can span to include the following (based on skills and interest):

- Create attractive, high quality UX designs, of both low and high fidelity.
- Knowledge of visual design and Analytical data visualization a plus.
- Involvement in end user research to explore, uncover and analyze end user requirements during field studies, user interviews etc
- Support of usability studies, including preparation, conduct, data analysis, and results presentation
- Collaboration with staff members on interaction design

## EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

- Must be proficient in HTML, Macromedia Flash, Flex, Adobe Photoshop, Dreamweaver or other prototyping/web 2.0 technologies
- Must be able to create dynamic prototypes which will be used for Usability tests and product demos
- Background or knowledge in Usability testing and User Centered Design is a plus
- Examples of work will be required for qualification

## WORK EXPERIENCE

Currently enrolled in a Masters degree in Computer science, Human computer interaction, Graphic Design, Arts or related discipline. Candidate should have completed one or more classes on programming languages pertaining to prototyping or web 2.0 technologies

Requires candidates to currently be enrolled in an undergraduate, Masters, MBA or PhD degree program which is applicable to the position.

SAP is the global market leader for business software and thus contributes a considerable part of the world's economic power grid. At SAP you get your chance to put your ideas into action with maximum impact.
